Profile

Experienced Automation QA Engineer with over five years in automated and manual testing. Committed to customer-focused outcomes, I prioritize long-term value and aim to exceed expectations. My approach integrates innovation in testing processes, enhancing efficiency and reliability. I uphold rigorous quality standards to effectively solve and prevent issues, setting ambitious goals that inspire the team to achieve exceptional results and continuous improvement.

Employment History

Automation QA Engineer, Avenga

January 2022 — Present

In this role, I have applied a broad range of testing strategies including API, e2e, load, and DB testing on several projects (see the projects list [here](#)). By introducing automated solutions, I cut manual testing costs by 60%, optimized the testing cycle, and enhanced overall efficiency, leading to a 30% improvement in defect detection which accelerated product releases and heightened client satisfaction.

Hybrid Automation & Manual QA, Patron Empowerment

February 2019 — January 2022

In this role, I led QA teams, overseeing both manual and automated testing processes. My leadership ensured high software quality and streamlined workflows. My efforts extended automation coverage, reducing testing time by 50%, decreasing bug rates by 20%, and increasing project delivery speed by 25%, helping our team meet critical deadlines and exceed stakeholder expectations.

Education

National Aerospace University <Kharkiv Aviation Institute>

2019 — 2021

Master's degree, Mobile application engineering

National Aerospace University <Kharkiv Aviation Institute>

2015 — 2019

Bachelor's degree, Systems Engineering
